NICKSON KUMAR D

UI/UX Designer | Web Developer | Java Back-End Developer
+91 9345288967 | smsnickson10@gmail.com | Thoothukudi, India
linkedin.com/in/nickson-d-kumar | github.com/Nickson-D-kumar

CAREER OBJECTIVE

Versatile developer and designer with hands-on experience in UI/UX design, front-end web development, and Java back-end development. Skilled in crafting end-to-end digital products, from Figma wireframes and interactive prototypes to Spring Boot REST APIs and MVC architectures. Proficient in building responsive interfaces, design systems, and full-featured web applications. Strong communicator with written and spoken English proficiency, eager to contribute across all phases of product development in collaborative, fast-paced environments.

TECHNICAL SKILLS

UI/UX Design: Wireframing, Mockups, Prototyping, Design Systems, UI Kit, Auto Layout, Components, Variants, Smart Animate, Visual Interface Design, UED

Design Tools: Figma, Adobe XD, Adobe Illustrator, Adobe Photoshop, Adobe Creative Suite, Canva

Front-End: HTML5, CSS3, JavaScript, React, Tailwind CSS, Thymeleaf, Responsive Design

Back-End: Java 17, Spring Boot 3, Spring Data JPA, Python Flask, Node.js, Express, RESTful APIs, MVC Architecture, Role-Based Access Control

Database & Tools: SQLite, MongoDB, Mongoose, MySQL, Apache POI, Git, GitHub, GitHub Pages

Languages: English (Written & Spoken), Tamil

PROJECTS

NEC Alumni Automation DM — Alumni CRM | Ongoing

React · Tailwind CSS · Node.js · Express · MongoDB · Mongoose · JWT

github.com/Nickson-D-kumar/NEC_Alumni_Automation_DM

- Developing a role-based alumni CRM with dashboards for administrators, officers, staff, and student coordinators to manage alumni records and outreach.
- Building multi-stage verification, coordinator assignment, call logs, monthly contact tracking, and escalation workflows with searchable, filtered, paginated records.
- Integrating Excel master-sheet imports and analytics dashboards to monitor verification progress, department-level completion, and outreach performance.

NEC Library — Smart Library Automation | Ongoing

React · Tailwind CSS · Node.js · Express · MySQL · REST APIs

github.com/Nickson-D-kumar/NEC_Library

- Developing a library automation platform with role-based access for students, staff, librarians, and administrators, supported by authenticated APIs.
- Building searchable book catalogues, checkout and return workflows, reservations, renewals, overdue tracking, and fine management with borrowing policies.
- Extending digital library cards, book suggestions, book-bank workflows, and library analytics with database migrations and student-specific data access.

BhuSetu — Urban Land Record Integration | Prototype

Python · Streamlit · GeoPandas · Shapely · Rasterio · Folium · SQLite

github.com/dhariqanvar-7/SIH-prototype

- Built an SIH prototype integrating parcel geometry, building footprints, roads, imagery, elevation, and synthetic departmental records in an interactive map.
- Implemented indexed record matching using identifiers, spatial R-tree queries, address tokens, and department-specific evidence scoring to flag uncertain associations.
- Added geometry validation, parcel profiles, human review with persistent audit history, and exports retaining source provenance and synthetic-data labels.

PROJECTS CONTINUED

SkyGuard AI — Weather Station Anomaly Detection | Prototype

React · Node.js · Express · MongoDB · Socket.IO · Python Flask · scikit-learn

github.com/Nickson-D-kumar/SkyGuard-AI

- Built a prototype for monitoring temperature, pressure, and humidity telemetry with live charts, station maps, and alerts delivered through Socket.IO.
- Combined physics-based rules, Isolation Forest trained on synthetic weather cycles, and rolling z-scores to detect spikes, flatlines, drift, and sensor dropouts.
- Added anomaly explanations, missing-value imputation, sensor-health scores, and simulated fault scenarios; used weather-consistency checks to distinguish storm patterns from sensor faults.

Roam — Vehicle Rental Management System

React · Vite · Python Flask · MongoDB · Node.js · Express · JWT

github.com/Nickson-D-kumar/vehicle_rental_system

- Built a rental application with separate customer and owner workflows, password hashing, JWT authentication, and role-based API authorization.
- Implemented vehicle search, filters, sorting, pickup and return date selection, server-calculated rental totals, booking history, and customer cancellation.
- Developed owner fleet CRUD, availability controls, and booking approval, rejection, start, and completion workflows; prevented overlapping reservations using atomic MongoDB updates.

Cinema Ticket Booking — UI/UX Prototype | 2024

Figma · Auto Layout · Components · Variants · Smart Animate

- Designed a complete end-to-end UI/UX prototype covering movie discovery, theatre selection, seat booking, payment flow, and e-ticket confirmation.
- Built a reusable UI Kit and Design System with typography, color palette, icons, buttons, movie cards, genre chips, navigation bars, and interactive seat states.
- Implemented Auto Layout, Components, Variants, Smart Animate, hover effects, and fixed navigation; improved UX through genre filtering, structured booking, and accessible high-contrast design.

Courier Management System — Web Application | 2024

Java 17 · Spring Boot 3 · Spring Data JPA · SQLite · Thymeleaf · HTML · CSS · JS

- Built a full-stack app with role-based access for Admin, Employee, and Customer, including login, registration, courier booking, tracking, and status updates.
- Designed RESTful APIs for couriers, employees, shipments, payments, and delivery status; developed nearest available employee assignment based on destination pincode.
- Integrated UPI, Card, and Cash on Delivery payment flows with validation and transaction rollback on failure; generated Excel reports using Apache POI.

Tour Booking Management System — Web Application | 2024

HTML · CSS · JavaScript · Figma

- Built a responsive booking platform with interactive prototypes and design templates, translating Figma mockups into a functional HTML, CSS, and JavaScript front-end.

ACHIEVEMENTS

- Tutedude Web Development Hackathon — Completed a 48-hour online hackathon (July 2025), finishing in the Top 20 teams; solved real-world challenges and delivered a web solution under time pressure.
- TCS CodeVita Round 1 Qualifier — competitive algorithmic problem-solving.
- Solved 1,400+ problems on Skillrack and 30+ problems on LeetCode.

EDUCATION

National Engineering College, Kovilpatti — B.E. Computer Science & Engineering

2024–2028 | CGPA: 7.87
